

Nationwide and InsureZone Partner to Launch API-Integrated Lines of Commercial Business

Fort Worth, Texas based InsureZone has announced their newest integration with Nationwide; an API driven commercial rating connection.

Through this integration, there will be five lines of Nationwide business made available to InsureZone's 25,000+ current users which include: BOP, Workers' Compensation, Commercial Auto, Umbrella and General Liability. This brings InsureZone to a total roster of 39 commercial and 36 personal electronic rating integrations across 17 different lines of business.

"Nationwide agents may already be familiar with the InsureZone platform, given our history of supporting the Nationwide Brokerage Services (NBS) division," said InsureZone CEO, John Pergande, "Nationwide's focus on the independent market has been strategic, and we take pride in being a chosen partner to make this happen."

"Nationwide will be present where and how independent agents choose to do business with us," said Chris Cargill, Nationwide's Director of Commercial Lines Digital Distribution.

"InsureZone is an established Insurtech with a proven track record of success. Feedback from our independent agents is a big factor in where we choose to integrate our Commercial Lines Quote API and InsureZone is a connection we knew we needed to prioritize."
